FDA Drug Shortage archive
38 Internet Archive captures
29 Dec 2019 – 21 Dec 2023
gaps up to 308 d
ASHP resolved bulletins
958 bulletins, 2015–2026
created and last-revised dates
FDA Orange Book + NDC Directory
product identity: application,
applicant, form, route, strength
Product episodes
2,042 NDC episodes
→ 298 drug headings
(median 4 NDCs/drug, max 96)
Two-level record linkage
L1 identity: 327 HIGH / 17 MED / 74 LOW
L2 spell: 27 CONFIRMED / 70 PROBABLE
/ 69 AMBIGUOUS
Harmonised markets (Appx C)
304 form/route labels → 179 groups
bounded applicant counts
Entry-identifiable cohort: 184 drugs
posting after first capture and entry bracketed
51 resolved · 113 ongoing · 9 disappeared · 11 ambiguous exit
→ analytical cohort 173 (ambiguous retained as a status)
Left-censored: 114 drugs
present at first capture or posted before it
used for prevalence only, not onset-anchored duration
Reconstruction rules compared on the 173-drug cohort with one shared exit rule
R0 NDC-level (pseudoreplication demonstration) · R1 drug, recorded posting · R2 drug, archive-observed onset interval · R3 hybrid ASHP onset / FDA exit (linkage coverage only)
